"I really believe that if the political leaders of the world could see their planet from a distance of, let's say 100,000 miles, their outlook would be fundamentally changed.

The all-important border would be invisible, that noisy argument suddenly silenced.

The earth must become as it appears:  
blue and white, not capitalist or communist;  
blue and white, not rich or poor;  
blue and white, not envious or envied.

There are few things more fragile or more beautiful than Earth, let's work together today and everyday to protect our home."

*Michael Collins*
